

TALON DVD +/- R Duplication Tower Systems

The TALON DVD-R and R/RW Tower Duplication Systems are full featured, reliable and economical duplicators utilizing new combo Pioneer DVD-R or DVD+R drive technology that also include support for CD-R. Now users can take advantage of the usability of the DVD format and the low cost of the CD-R format in one tower system configuration. Discs created with the TALON DVD +R/RW systems can be played back in virtually any set top player or any DVD ROM reader in a PC or laptop device. In addition, the DVD +R/RWs menu commands include editing and track extraction functions that allow for the creation of compilation discs, and verify data written to duplicated DVD +RW or CD R discs. Call today for more details!
